conorao@gmail.com

San Diego, CA, 92101

Experienced software professional with 10+ years experience with Ruby, Rails, Javascript, Python, and agentic AI. Maintained existing software and built greenfield apps. Extensive experience with AWS and Linux servers.

Work Experience

Director of Engineering – Athlete Studio – San Diego, California (Remote)

Mar 2023 – Present

- Architected the entire initial application stack including Elastic Beanstalk on AWS and Ruby on Rails
- Automated Shopify e-commerce platform reporting with individual dashboards for athlete clients
- Integrated with over 10 external sources to feed internal reporting and dashboards, including ERP systems
- Managed a team of 6 developers across the application stack
- Created AI-powered pipelines in the app to improve accuracy in automating e-commerce operations
- Processed over \$1 million in e-commerce alone annually

Senior Software Engineer, Team Lead – Dapper Labs – Vancouver, BC (Remote)

Mar 2022 – Mar 2023

- Maintained and modernized legacy Rails app post-acquisition to support NBA, NFL, WNBA athletes' sites
- Integrated with Dapper Labs' Web3 platform with custom digital collectibles
- Created graphics, dynamic experiences, and in-arena interactive experiences using Flow
- Handled over 20,000 concurrent users via mobile experiences in arenas & stadiums via our platform

Senior Software Engineer – Realvolve – Denver, Colorado (Remote)

Mar 2020 – Mar 2022

- Modernized and maintained legacy real estate CRM, a Rails 4 app
- Separated email delivery architecture into its own microservice, improving app performance by over 40%
- Migrated core services from Heroku to AWS with live fail-over.
- Optimized performance for mobile app by building a new API based off the previous one

Lead Software Architect – Million – Boston, Massachusetts

Jun 2016 – Feb 2020

- Built flagship web app, a website builder & CRM using Ruby on Rails, Javascript, and AngularJS
- Created digital contract tool, giveaway tool, and email tool for marketing operations
- Built company's first test infrastructure, automating it using Jenkins
- Trained first new hires

Education

Computer Science & Interactive Media – Northeastern University – Boston, Massachusetts
